Will VLE use affect student attendance?
Getting notes on the VLE makes me less likely to go to lectures

67.4% (2009) and 69.2% (2011) disagreed
Getting notes on VLE makes me less likely to go to lectures

Note: Based on the % of disagreement to this item, most students would still go to class despite being able to access lecture notes on VLE. It’s a good sign/finding suggesting that VLE use is not likely going to result in absenteeism.
Note: It’s quite clear that most students would like to see better lecturer usage/more lecturers use VLE
“[The VLE] is not being used to its potential.” [Science/General Nursing Student]

“I’d like to see more interactive learning on the VLE; lecturers should put more diverse types of learning tools such as story-telling.” [Arts/Humanities student]

“Moodle is essential for studying at home when it comes to exam time. It would be great if all our lecturers made proper use of it. Some have all of their material nicely organised and easy to access, others have everything jumbled up and mixed between courses.” [Computer Engineering Student]
