Geotechnical Engineering Education and Training

Edited by
Iacint Manoliu, Ion Antonescu & Nicoleta Rădulescu
Technical University of Civil Engineering, Bucharest, Romania
# Table of contents

**Introduction** XI

1 *Invited papers*

- Civil and geotechnical engineering in society – Ethical aspects and future prospects  
  *H.Brandl*  
  3

- The impact of knowledge management and ICT  
  *F.B.J.Barends*  
  15

- Teaching geotechnical engineering 1950-2000 and beyond  
  *S.Prakash*  
  25

- Education in earthquake geotechnical engineering: Practice and needs  
  *P.S.Séco e Pinto*  
  33

- Developing computer based instruction for geotechnical education  
  *S.Sharma*  
  47

- Trends in engineering education worldwide and their relevance for geotechnical  
  engineering education  
  *I.Manoliu*  
  63

2 *National reports on geotechnical engineering education*

- Geotechnical engineering education and training in Belgium  
  *W.Haegeman*  
  85

- Geotechnical engineering education and training in Brazil  
  *E.M.Palmeira*  
  89

- Some problems of the geotechnical engineering education in Bulgaria  
  *T.S.Germanov*  
  97

- A brief view of the education in geotechnical engineering in Chile  
  *R.Verdugo & C.Andrade*  
  101

- La formation en géotechnique en Côte d’Ivoire  
  *B.Pango-Tati*  
  105
Geotechnical engineering education and training in Croatia
V.Szavits-Nossan

L’enseignement de la mécanique des sols en France dans les formations d’ingénieur en génie civil
R.Kastner

Geotechnical engineering education in Germany
U.Arslan, R.Katzenbach & J.Turek

Geotechnical engineering education in Greece
D.K.Amatzidis & A.G.Anagnostopoulos

Geotechnical education in Ireland
B.M.Lehane, M.Creed, T.L.Orr, M.Long & M.Rodgers

An overview of geotechnical engineering education in Japan
H.Ohta, H.Sekiguchi & T.Mitachi

Geotechnical engineering education and training in Lithuania
V.Stragys

National report – Mexico
O.R.Couttolenc, H.Haas & V.Taboada

Geotechnical engineering education in New Zealand
D.L.Fellows

On geotechnical engineering education and training in Poland
E.Dembicki

Geotechnical engineering education in Romania
I.Manoliu

Geotechnical engineering education in Sri Lanka
S.A.S.Kulathilaka

Geotechnical engineering education and training in Sweden
G.B.Sällfors & M.Gustafsson

Geotechnical Engineering (GE) education in Vietnam and some ideas on future improvement
N.Cong Man

3 Place, role and content of geotechnical engineering in civil, environmental and earthquake engineering curricula, at undergraduate and post-graduate level

The importance of education in geotechnical engineering
S.Akbulut

Enseignement de la géotechnique à l’université de Tizi-Ouzou, Algérie
R.Bahar & B.Melbouci

Underground structures mechanics as a part of geotechnical engineering
N.S.Bulychev
New trends in geotechnical engineering education
S.F.O.Cinicioglu

Geomechanics in construction management
R.A.Coleman

Enseignement de la géotechnique dans les départements de génie civil de l’Institut Universitaire de Technologie, France
Ch.Coulet

Geotechnical engineering education in Tongji University
G.Da-Zhao

Notes on geotechnics in the university curriculum
J.Feda

The necessity of knowledge of geotechnics for officers of military ground forces
I.Has & A.Pogány

Education and training of geotechnical engineering specialists for various branches of construction
V.D.Kazarnovsky

UFV’s geotechnical engineering experience: Curricula at the graduate and undergraduate geotechnical engineering courses

Geotechnical education and training in St. Petersburg State University of Architecture and Civil Engineering
R.A.Mangushev & S.N.Sotnicov

The geotechnical engineering courses at the University of Minho, Portugal
F.F.Martins

Specific aspects of geotechnical engineering education at the Ecole Nationale des Ponts et Chaussées
F.Schlosser, S.Amar & J.Canou

Teaching of geotechnics at the Czech Technical University
I.Vaníček

Challenges in geotechnical engineering education
L.D.Wesley

4 Teaching, learning and assessment in geotechnical engineering education

Teaching of knowledge concerning the behaviour of unsaturated soils
S.Andrei & S.Manea

Utility of physical models for a better understanding of soil behaviour
S.Andrei & S.Manea

Limit equilibrium methods for stability analysis in landfills
L.Bellezza
Geotechnical centrifuge applications to foundations engineering teaching
B.Caicedo

Enseignement de la rhéologie expérimentale pour la recherche
J.Canou, J.-C.Dupla, J.-L.Favre, E.Dufour-Laridan & Ph.Reiffsteck

Un enseignement de spécialité, le cours de stabilité des pentes de l’ENTPE

Teaching earth pressure problems and stability problems from the point of applied mechanics
S.Kobayashi

Uncertainty in basic laboratory and field properties of geomaterials
F.H.Kulhawy, W.A.Prakoso & K.K.Phoon

The usefulness of a multidisciplinary approach in geotechnical engineering education
claimed by slope stability analyses
D.N.Păunescu & N.Mărgărit

Some experience after lecturing on ground improvement at the Faculty of Civil Engineering
of the Silesian Technical University in Gliwice
J.A.Sekowski

5 The use of information and communication technology – ICT in geotechnical engineering education

Geomeca – Multimedia pour l’éducation: Comportement des sols
J.Biarez, A.Gomes Correia & S.Taibi

Demonstration models for undergraduate teaching in geotechnics
F.Bucher

Interactive multimedia geotechnical engineering course
M.Budhu

Computer aided learning in geotechnical engineering education
M.B.Jaksa, L.R.Davison & D.G.Toll

The use of simple models for undergraduate teaching of geomechanics
J.K.Kodikara

Place des méthodes numériques dans l’enseignement de la géotechnique
Ph.Mestat & Y.Riou

GIS – Necessity and means of work in the near future for geotechnicians
A.Pogány

Building research skills: A course-integrated training method
A.Popescu & R.Popescu

Educating geotechnical engineers in the age of computers
L.C.Reese & W.M.Isenhower

Application of geotechnical software in education
P.Santrac
An interactive approach for geotechnical engineering education
S. Singh

On the computer aided education of analysis of vertical stresses and settlements of the elastic half-space loaded with various vertical loads
M. Skrinar & D. Battelino

Stresses and settlements in homogeneous, elastic, isotropic half space, under the load described by a plane over the rectangle
M. Skrinar & D. Battelino

Introduction into dynamical soil-structure interaction problems
A. Strukelj

6 Case studies in geotechnical engineering education

Use of case histories comparison in teaching process
A. Chirică, A. Olteanu, M. S. Șerbulea & C. Banciu

The practical experience of professors on the geotechnical teaching process
O. Couttolenc

Statnamic load testing: After the successes in the USA and Asia, getting ready for Europe
G. van Ginneken & P. Middendorp

A determination to suction capacity of clay with an empirical method
S. N. Keskin, Ö. Çimen & H. Yildirim

Focus on real life problems facilitating learning and understanding
L. Lundell-Sällfors & G. B. Sällfors

Etude dans le cadre d’une mobilité universitaire du glissement de terrain de Mont de l’Enclus
C. Schroeder & D. N. Păunescu

The importance of teaching case histories in the geotechnical education in Austria
S. Semprich

Straightening of tall structures tilted as a consequence of uneven settlement of foundation soil: Case histories
I. Stânculescu, I. Antonescu & A. Olteanu

7 History, lifelong learning and international cooperation in geotechnical engineering education

History of soil mechanics at MIT, 1925-1996
H. P. Aldrich Jr & R. V. Whitman

Future challenges and opportunities for the geotechnical teaching
R. Flores-Berrones

Pour l’enseignement de l’histoire de la géotechnique
M. Gambin & J.-P. Magnan
The collaborative geotechnical engineering research of students in the Civil Engineering Department, Khon Kaen University, Thailand
W.Gasaluck

La formation continue en géotechnique à l'Ecole Nationale des Ponts et Chaussées, France
J.-P.Magnan & E.CARRIER

International cooperation in geotechnical engineering education – A case study involving Romanian and EU universities
I.Manoliu & N.Radulescu

Taught postgraduate geotechnical education in Scotland
J.Oliphant & W.M.Stewart

Geotechnical engineering: French universities postgraduate programs – Doctorate: D.E.A. + 3-4 years
L.Vinet

International student exchanges: Conditions for a broader development
A.Vuez

8 Additional paper

Basic aspects of Environmental Geotechnics education
M.Manassero & C.Spanna

Author index
